REPORT NO.

The Czechoslovak atomic energy commission, headed by General Mikeš, has just been completely reorganized. The work of the commission will center around a new installation for nuclear experiments which will be set up at Brno. It is expected that the new atomic pile in southern Bohemia will begin work at the beginning of 1954. The latest trials, conducted in the presence of General Gusev, Soviet military attache, have given complete satisfaction. Research is being conducted into possible new uranium deposits in the region of Nitka Karparty under the direction of General Karol Bacilek.
